

COMPANY STORY

TITE-SPOT Welders, Inc.™ Committed To Serving The Body Shop Industry Since 1983

Dear Valued Customer,

As any good craftsman can tell you, good tools make the work easy! Just ask me, Paul Wilcox, President of TITE-SPOT Welders, Inc. I have been in the Body Shop Industry for the past 35 years. I have made my living doing the work and consider myself a journeyman. I have also been a Body Shop Manager at a Buick garage and I have owned my own shop.

Wherever the job, I recognized a need for efficient welding tools, tools that were fast, safe and could reproduce that “factory appearance”. With my experience in the trade, I have created spot welding equipment using the finest materials available. These tools will maximize your productivity and increase your profits!

In 1983, I created the TITE-SPOT Pliers™. This was the first spot welding pliers manufactured for the Body Shop Industry with patented compressed air-cooling, and is *still* the only one on the market today. Made in Milwaukee, Wisconsin, TITE-SPOT Welders, Inc. has continued to innovate and make superior welding equipment which now includes the powerful S.W.A.T.™ Welder and the sophisticated DiGi S.W.A.T.™ Welder.

Paul Wilcox, President of TITE-SPOT Welders, Inc., was a Journeyman Bodyman, has been a Body Shop Manager at a Buick garage and owned his own shop. Paul has a complete understanding of the Body Shop Industry.

I have designed and built 440 volt units as specials for General Motors. I have produced video training tapes to further help professional technicians like yourself. With my special attention to detail, I demonstrate how easy it is to operate all of my products. My philosophy is simple, “Get the work done quickly and correctly and never ever have a comeback.”

Using superior engineering and the highest quality components, TITE-SPOT tools and machinery out perform other manufacturers on quality, service, price, and availability.

TITE-SPOT makes wonderful tools at reasonable prices.

Sincerely yours,

Paul Wilcox
