| TS HMSC                              | HEAT MANAGEMENT SYSTEM CHILLER<br>ALL UPGRADE KITS INCLUDE: Refrigerates your shop's compressed air for extra   | \$395.00           | 26 - 1 - A   |
|                                      | cooling capacity. Uses no extra shop air. Welding electrodes last longer.   |                    | -            |
|                                      | LET'S DO THE MATH: To show the quantity of heat we must dissipate   |                    |              |
|                                      | $I^2R$ = power lost in the welding cables that must be dissipated.<br>I is the current the welder is putting out (say 4,000 amps) so $I^2$ equals 16,000,000, <i>a</i>    |                    | A            |
|                                      | very big number, R= the resistance of 17 feet of welding cable @ .0035 ohms per   |                    |              |
|                                      | foot = .0595 ohms, a small number So the power to dissipate (16,000,000 x .0595) =  |                    |              |
|                                      | 952,000 watts or, to put it another way, the heat of 9,520 100 watt light bulbs, a lot of   |                    |              |
| TS 102 PLIERS                        | heat UPGRADE KITS FOR: LENCO; PORTA-SPOT; OTHER WELDERS   | \$1,195.00         |              |
|                                      | ALL UPGRADE KITS INCLUDE: Welding cord set 8'6" long: Foot pedal switch on 8'   | φ1,100.00          |              |
|                                      | cord: One spare set of standard tips: One set of Hi-LO tips: Door panel tip:  |                    |              |
